

LinkeGreen A NEW ERA FOR GREENFIELD INVESTMENT

BRIGHT FUTURE

lssue

The market for the development of new renewable plants and the problem of matching developers and investors.

The main issues highlighted by the Italian market are:

Lateness: too long a timeframe for finding new projects at an advanced stage of development and opportunities in line with the financial models adopted by investors.

Old-fashioned word of mouth: the current tools for finding the right information are incomplete and difficult to use.

Off-line market: interactions between investors and developers require exhausting timeconsuming negotiations that often do not generate real opportunities.

4

Speed: Investors can immediately access a list of opportunities, click and download the project teaser.

Solution

A platform where developers' supply and investors' demand meet.

The main advantages of Linkegreen are:

Truthfulness: teasers undergo preliminary analysis by experts in the field.

Process simplification: the platform simplifies matching, making the entire process transparent and identifying the opportunities most in line with investors' wishes.

BENVENUTO NELLA TUA DASHBOARD SVILUPPATORE.

Questo è il tuo centro di controllo personale, progettato per fornirti strumenti efficaci ed avere una visione dettagliata del tuo progetto: potrai monitorare attentamente tutte le statistiche, visualizzare l'interesse generato e tracciare gli accessi e i download del tuo progetto da parte degli investitori.

4 TRACK YOUR PROJECTS

Stay constantly updated on the status of your project with our intuitive **dashboard**.

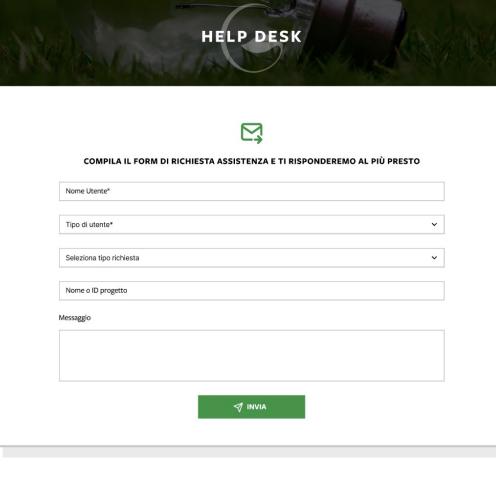

Here you can track statistics, view and monitor **access** and **downloads** of your project by investors.

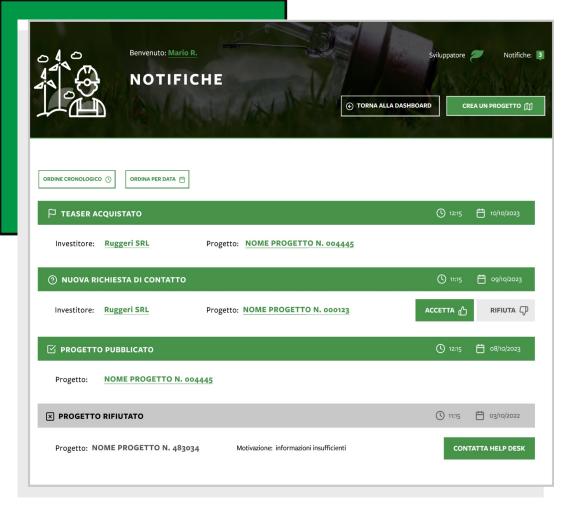

5 ONGOING SUPPORT

Trust our experienced team to **review** your **project** before publication.

Get **support** to correct any mistakes and make sure your project is irresistible to renewable energy investors and investment funds.

6 FIND YOUR INVESTOR

With our help, you will have the opportunity to connect and **match** with leading **financiers** and players in the renewable energy sector.
